Samruddhi Alekar

Business Technology Solutions Associate @ ZS Associates | PICT'24

Pune District, Maharashtra, India

Summary

I'm a frontend-focused Software Engineer passionate about building intuitive, scalable, and impactful web applications. I specialize in React, TypeScript, and AWS, with hands-on experience developing and deploying enterprise-grade solutions in client-facing environments. At ZS Associates, I work on transforming complex business requirements into seamless user experiences. This includes building dashboards that support supply chain decision-making and optimizing frontend pipelines and automations to improve performance and efficiency. My background combines a strong foundation in software engineering fundamentals, cloud technologies, and cross-functional collaboration. This allows me to bridge the gap between technical depth and business impact. I enjoy being part of high-performing teams that value clean code, reliable deployments, and continuous learning. Beyond work, I'm deeply curious about emerging technologies in cloud computing, scalable UI systems, and intelligent automation. I'm always looking for opportunities to build, learn, and grow.
